PROJECTS

Market Data on Demand Application (06/2021 - Present)

- A financial data application that delivers end-of- day market data to clients on demand. It supports data requests for a wide range of securities, including equities, mutual funds, bonds, and debts.
- Developed the application from scratch in Angular.
- Technologies: Angular, GQL, Node.js, Go

gRPC Service Management Tool (08/2024 - Present)

- A Retool-based tool for managing gRPC services, improving coordination between operations and development teams.
- Developed and currently adding features continuously to the tool.
- Integrated back-end services and collaborated with operations team to gather and implement requirements effectively.
- Technologies: Retool, gRPC, SQL

Vendor Management System (01/2021 - Present)

- Manages vendor and client data distribution for financial products, focusing on authentication and authorization.
- Responsible for the enhancements and bug fixes of the app.
- Technologies: Angular, Java

Agreement App (10/2022 - 04/2024)

- Allows clients to sign agreements online for exchange data access, enabling product authorization.
- Involved in the maintenance and bug fixes of the app.
- Technologies: AngularJS 1.x, Java
